The snow is almost gone. The roads are bad and travel is now mostly on wheels. The Budget.

Mr. Tilley delivered his first Budget sp on the let inst. It took an hour and a half in delivery, and occupies aix columns of the Toronto Mail. Notwithstanding the loss of revenue by the reduction of the tes and coffee duties, it is not proposed to after the tariff this year. The Finance Minister esti-mates that he can obtain \$21,000,000 from the ordinary sources of revenue, which will be more than sufficient to meet the ordinary entirely stripped. His purse, containing sixty odd dollars, was found under his body, the Indians having dropped it.

MR. MERCHAN WAS SHOT in three places, one ball entering at the inner corner of his right eye, and another in the side of his nead. These are both beleived to have lodged within his cranium, the third passing through his right forearm. He also received a cut in his left arm, and a scale

Solicitors-DRAKE & JACKSON. BANKERS :

THE COMPANY IS FORMED FOR the purpose of acquiring the property known a lelmont Factory, situate on Esquimalt Harbor, an unsiness carried on therein, consisting of Tanning Root and Shoe Manufacturing, and of continuin the same.

The purchase would include the Land, Buildings, Mathiery, Plant, Stock-in-Trade and goodwill of the business, all of which it is proposed shall be taken at a valuation to be made by competent disinterested persons.

The Boot and Shoe Department has for the past two The Boot and Shoe Department has for the past two years been carried on under the management of Mr. Switzer, almost exclusively by Chinese labor, at a small cost, but die recent addition of the Tannery, which was found a necessity, in order to maintain a sufficient supply of good material, has required a considerable ontlay, and renders the introduction of further capital necessary for the proper development of the business.

The Factory is well arranged, and is fitted with the root approved Machinery. nost approved Machinery.
The Tannery has every appliance for the saving

The Water Power which is utilized for the conduct of Works, is all that could be desired, and could readily be increased to ten times its present power, if at any time required, either for the purposes of this undertaking, or for any other Manniactory. The supply is derived from Springs on the Estate, is very soft in quality, and is never failing.

In fact the business is in thorough working order, and Mr. Switzer's services as Manager of the Werks, will be retained upon forms faverable to the Company. The Land densists of 86 sores, known as the Spring Vale Estate, some of which is of excellent quality.

The Timber is of considerable value for Firewood, the situation being inversable for easy delivery.

The cools are specially adapted to the requirements of the Provincial trade, have given general satisfaction, and at a profit successfully compete with the imported article.

The sales for 1872 amounted to nearly, \$30,000, which,

duced at low prices by an economical process, and, as there is no difficulty in obtaining an abundant supply of Bides, the outturn will be sufficient for the supply of the general demand for harness, mill belting, &c., in addition to the requirements of the Boot Factory.

The Belmont Boot and Shee Factory was the first enterprise of its kind established in the Province, and its liaving been so far carried on with success is an assurance that, &s. population increases, very remanerative returns will be realised.

The value of industrial institutions to the well being of any country is indisputable, and as the hides produced in the Province are now being manufactured into leather, which in turn is made into Boots and Shors, described of as formerly being exported and the manufactured articles in turn imported, the saving to manufacture to a transfer being exported.

ire in any way interested in the property of the Prolines.

It should be remarked that this company will become
at once possessed of two businesses with established
connections, without any interruption to working or
loss of time in transfer, and will therefore have from the
first day of the possession a revenue from a business
which is capable not only of immediate, but, in the
fasters stands uplimited extension.

Most similar undertakings of any magnitude are now
worked successfully by joint stock companies, both in
Great Britain and in the United States.

The transfer of the property to the Company will only
be made upon terms satisfactory to the Provisional
Board of Directors, based upon the valuation. The purchase will be effected to a large extent in shares retained
by the present proprietor, a portion of which will not
participate in any profit until a dividend of 10 per cent.
Applications for shares may be made to the Secretary
prefers, the Bank of British Columbia, or to Messrs.
Drake & Jackson.
